Product description

The present certificates are bearer debt instruments issued by Portfolio Solutions S.A., Luxembourg that mirror the performance and risk profile of the LGT (Lux) III – ILS Plus Fund. The underlying invests in a broadly diversified portfolio of insurance-linked bonds (also referred to as cat bonds) as well as collateralised reinsurance. These instruments are issued by insurance and reinsurance companies to hedge against events giving rise to (re-) insurance claims. The risk assumed by the investor is therefore tied to clearly defined disasters (e.g. earthquakes, hurricanes). Counterparty or credit risks are eliminated to a large extent through structural features. Currency risks are hedged against the share class currency.
